

Design comments:

- Plaza design should respond to pedestrian flows and desire lines around and through the site
- Use landform and plant material to frame views and create outdoor rooms for conversation- create sense of enclosure
- Use color, texture and scale within the space to create visual interest (feature elements, lighting, paving design, landscaping, furnishings, etc.)

use landscape to define space and respect circulation

salvage and reuse building panels in landscape or plaza

water feature to help animate space and solve topography issues
